

The bridge to possible

Getting Ready for Private 5G Deployments

Krishna Chirala, Director Product Management
@chiralakp

Cisco Webex App

Questions?

Use Cisco Webex App to chat with the speaker after the session

How

- 1 Find this session in the Cisco Live Mobile App
- 2 Click “Join the Discussion”
- 3 Install the Webex App or go directly to the Webex space
- 4 Enter messages/questions in the Webex space

Webex spaces will be moderated until February 24, 2023.

Cisco Private 5G priority deployment scenarios

Manufacturing and Industrial IoT	Logistics/Distribution /Warehouse	Higher Education/ R&D Campus	Hospitality and Venues	Energy and Utilities	Mining, Oil, and Gas
 <ul style="list-style-type: none">• Robotics process automation and precision control• Automated guided vehicles/seamless mobility• High-speed software downloads• AR/VR applications	 <ul style="list-style-type: none">• Distribution line/workflow automation• Automated guided vehicles/seamless mobility• Asset tracking• Push-to-talk applications	 <ul style="list-style-type: none">• R&D/high-volume data transfer• Service/application experimentation• Interactive video	 <ul style="list-style-type: none">• Ultra-fast mobile connectivity in dense environment• Enhanced video streaming• AR/VR immersive experience applications• Digital signage• Facility monitoring/security	 <ul style="list-style-type: none">• Enable end-to-end smart grid infrastructure management• Fully automate smart meter reading• Provide secure and reliable field worker communications	 <ul style="list-style-type: none">• Reliable vehicle control over large areas• Enhance worker safety• Improve profitability through automated asset tracking and management

Key Considerations

Technology

- Coverage (sqft)
Wifi, P5G
- Spectrum
Licensed, Unlicensed
- Operations
Complexity for build out and ongoing

Purchasing/Procurement

- Device Ecosystem –
4G, 5G device availability
- Spectrum
GAA – No charge, PAL – Leased
- TCO / Business Outcome

Private 5G solution components

Management

Cloud managed

Identity and policy

Intuitively integrated into existing enterprise systems

Security

Full stack end to end security

Mobility core

Industry-leading 4G/5G converged mobility core

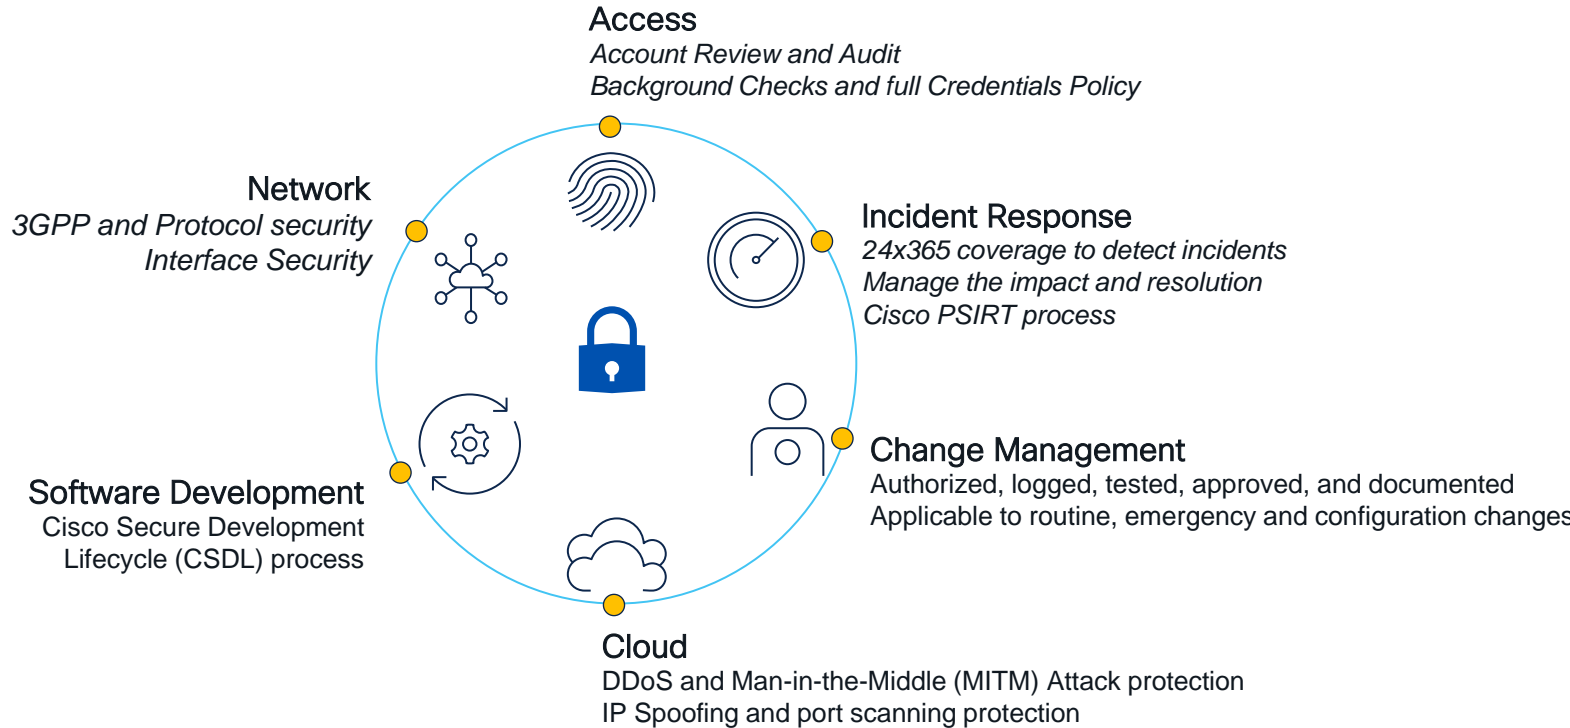

Radios

Certified and validated Open RAN radio partners

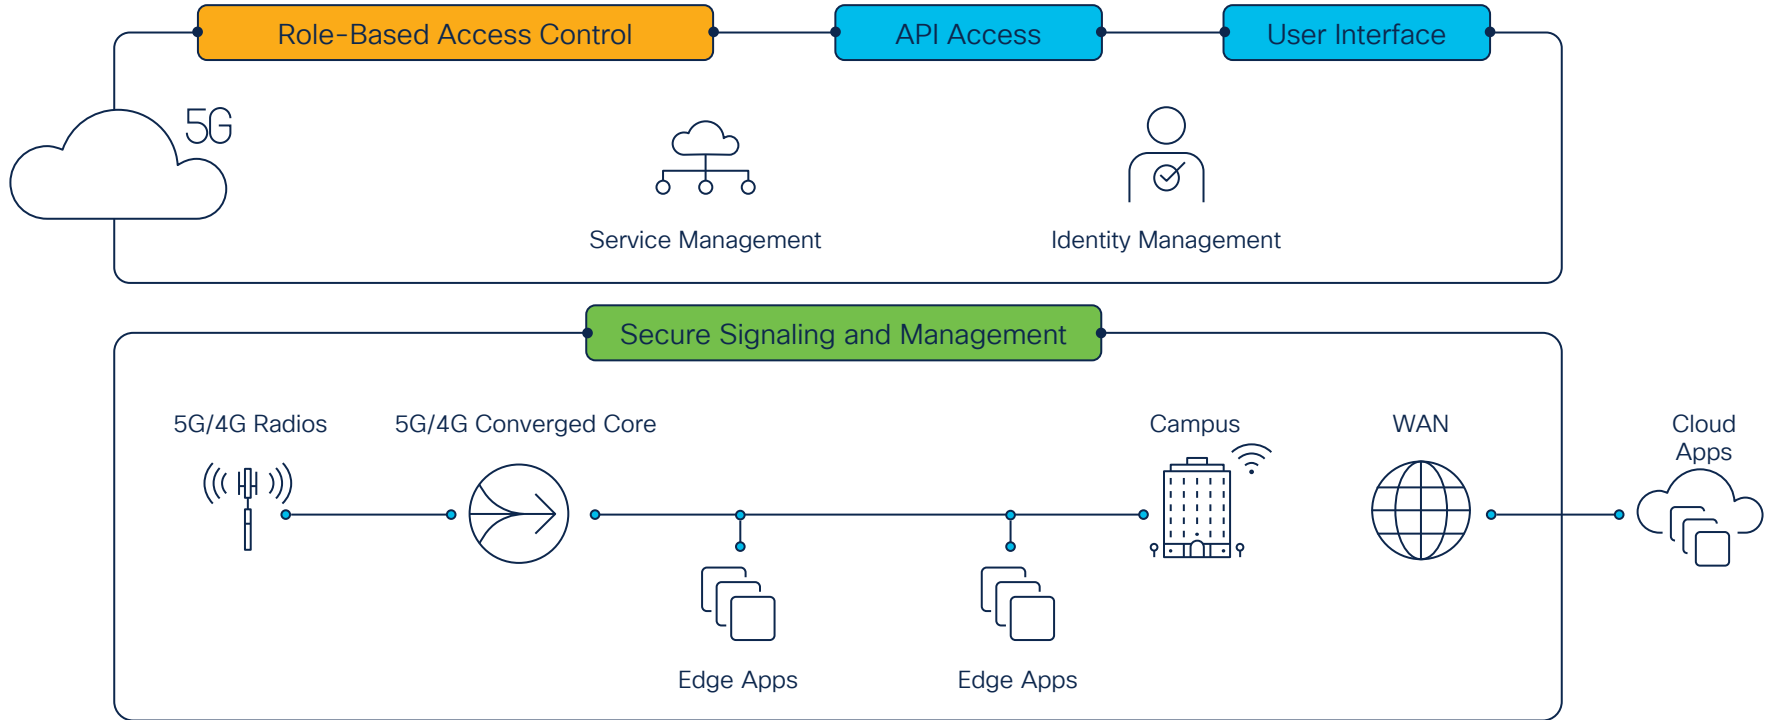

Cisco software,
delivered as a
service

MSP Partner
provides HW,
spectrum, and
onsite services

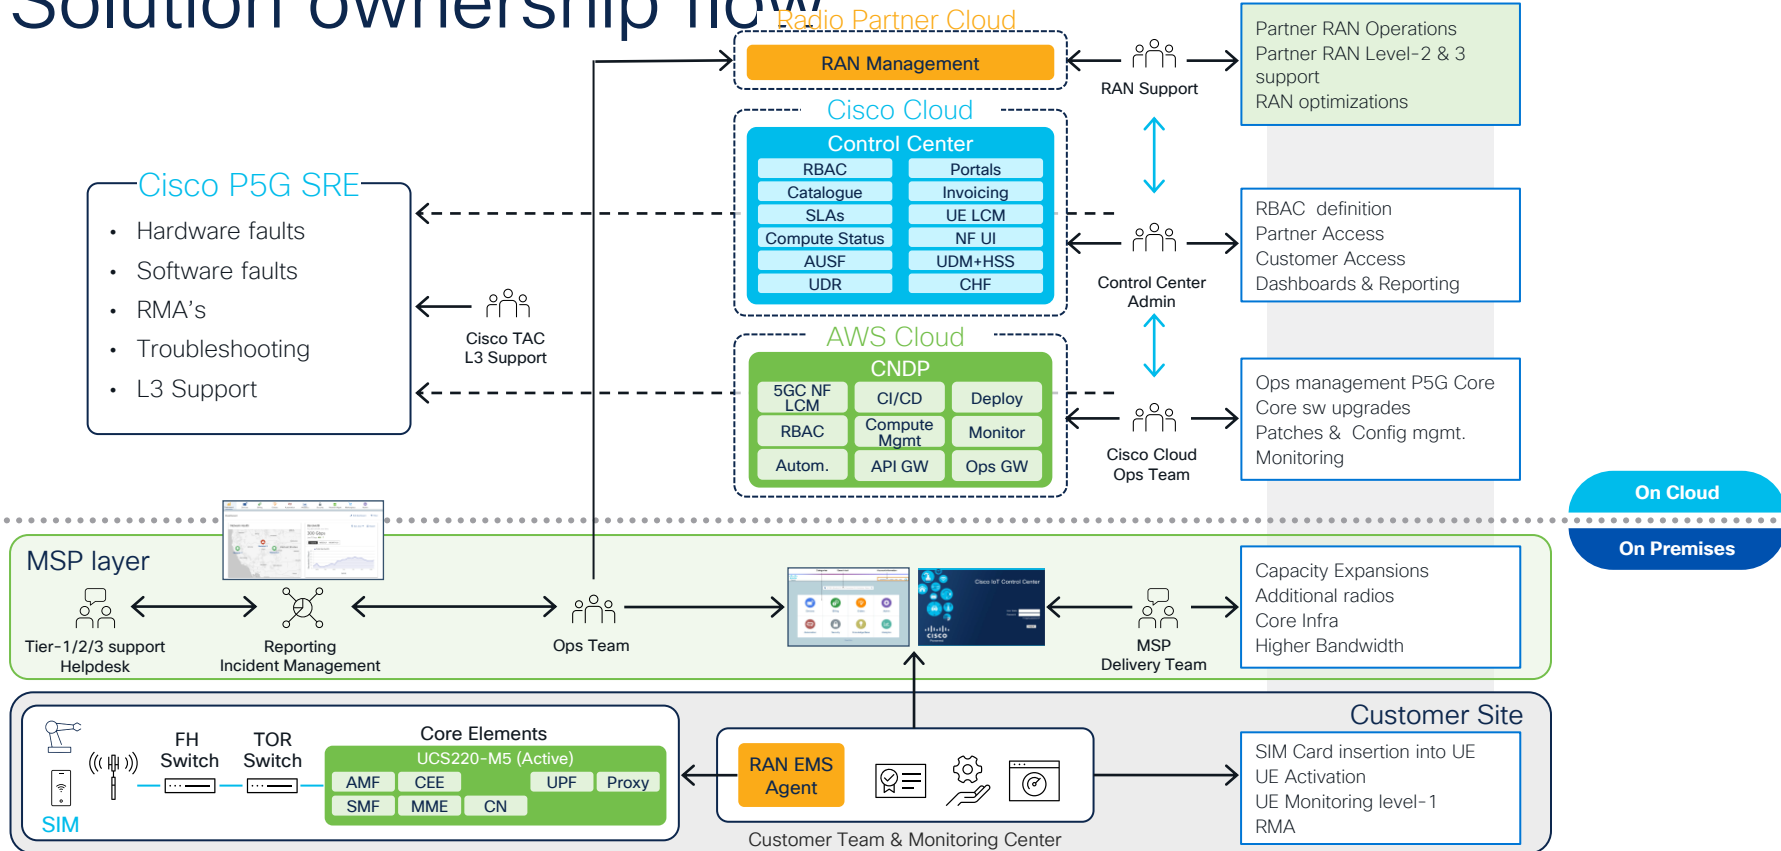

Security Breakdown

Simple and secure

SIM Ordering

- MSP has an Online SIM Ordering Form
- SIMs are ordered and shipped in lots of 50
- There is a maximum order of 6 lots (300 SIMs) per order
- All requests must be approved by
 - A designated SIM Ordering Point of Contact (MSP)
 - Cisco Product Management

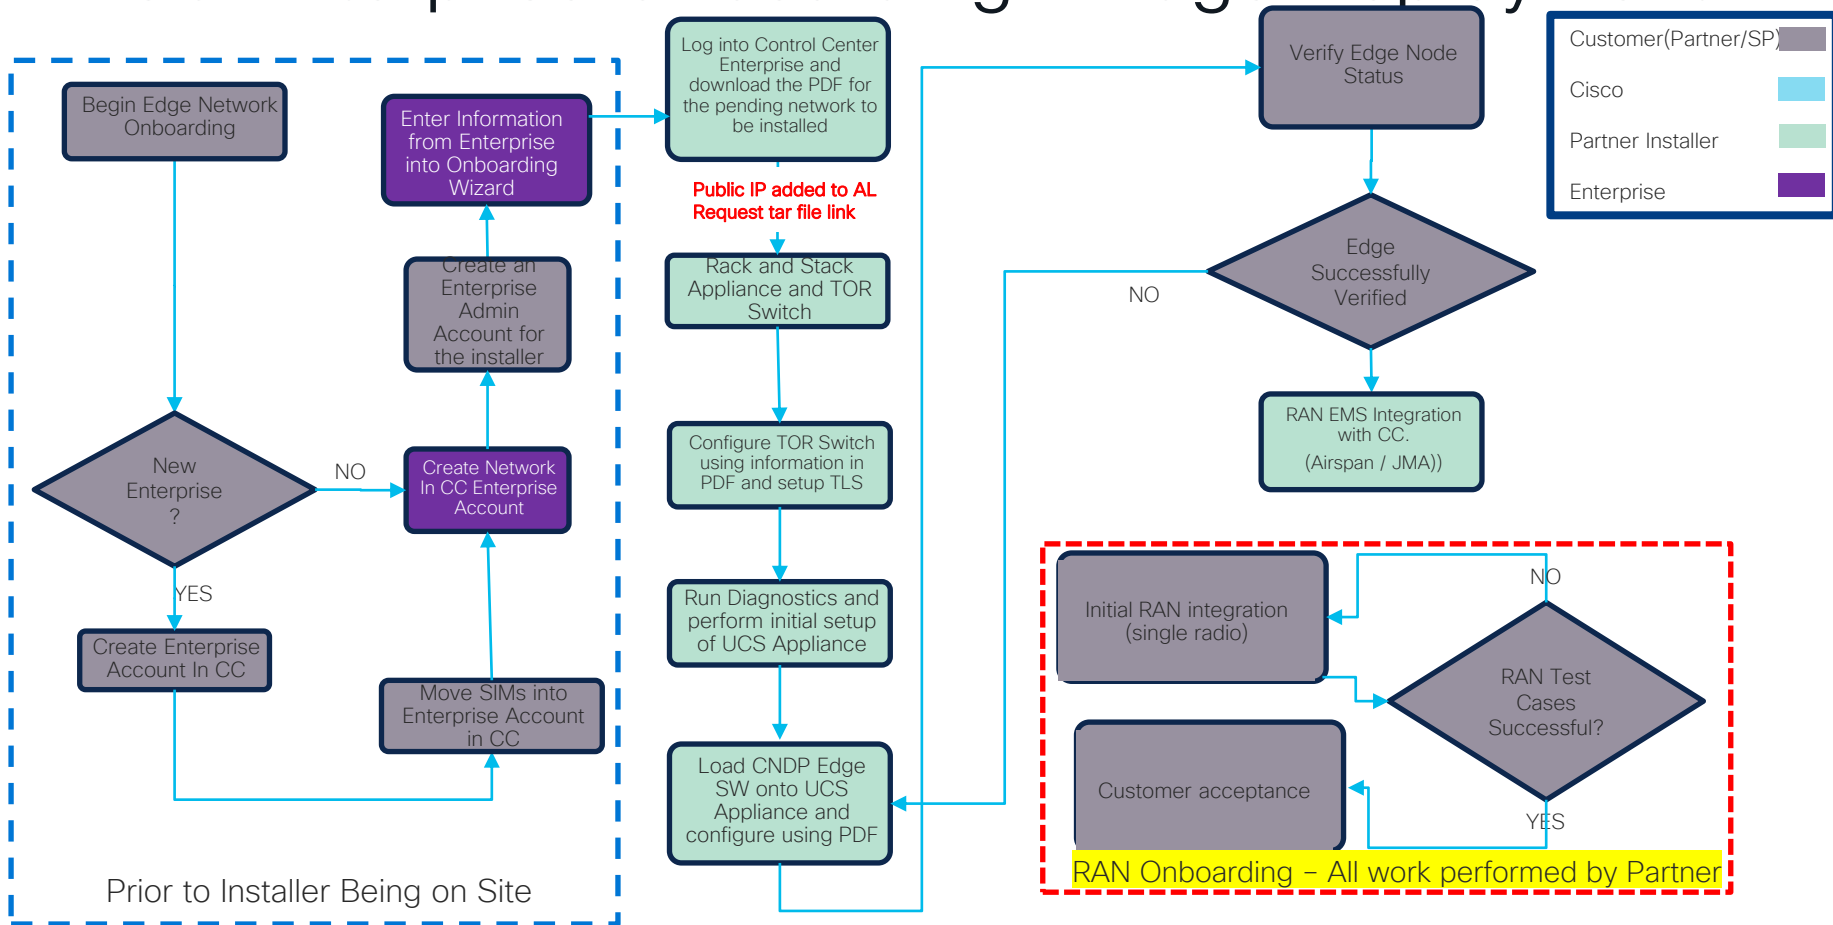

P5G MSP SIM Ordering and Fulfillment Process

Enterprise
Onboarding

P5G Enterprise Onboarding + Edge Deployment

Service Delivery Portal

- MSP has a Private Portal for Cisco P5G Service Delivery Requests
- All requests must be approved by a designated MSP SP Admin
- MSP may use the portal to request
 - Public IP added to allow listing for a new edge
 - TAR file download links and
 - Cisco Project Manager for assisted onboarding
- This page also has a link to the SIM ordering page.

Sample Use Case and Architecture

Use Case – Industrial Site

Deployment scenario

- Provide connectivity to end user tablets
- Distance of 1300+ meters
- Current Wifi spectrum unstable
- Interconnectivity between several sites

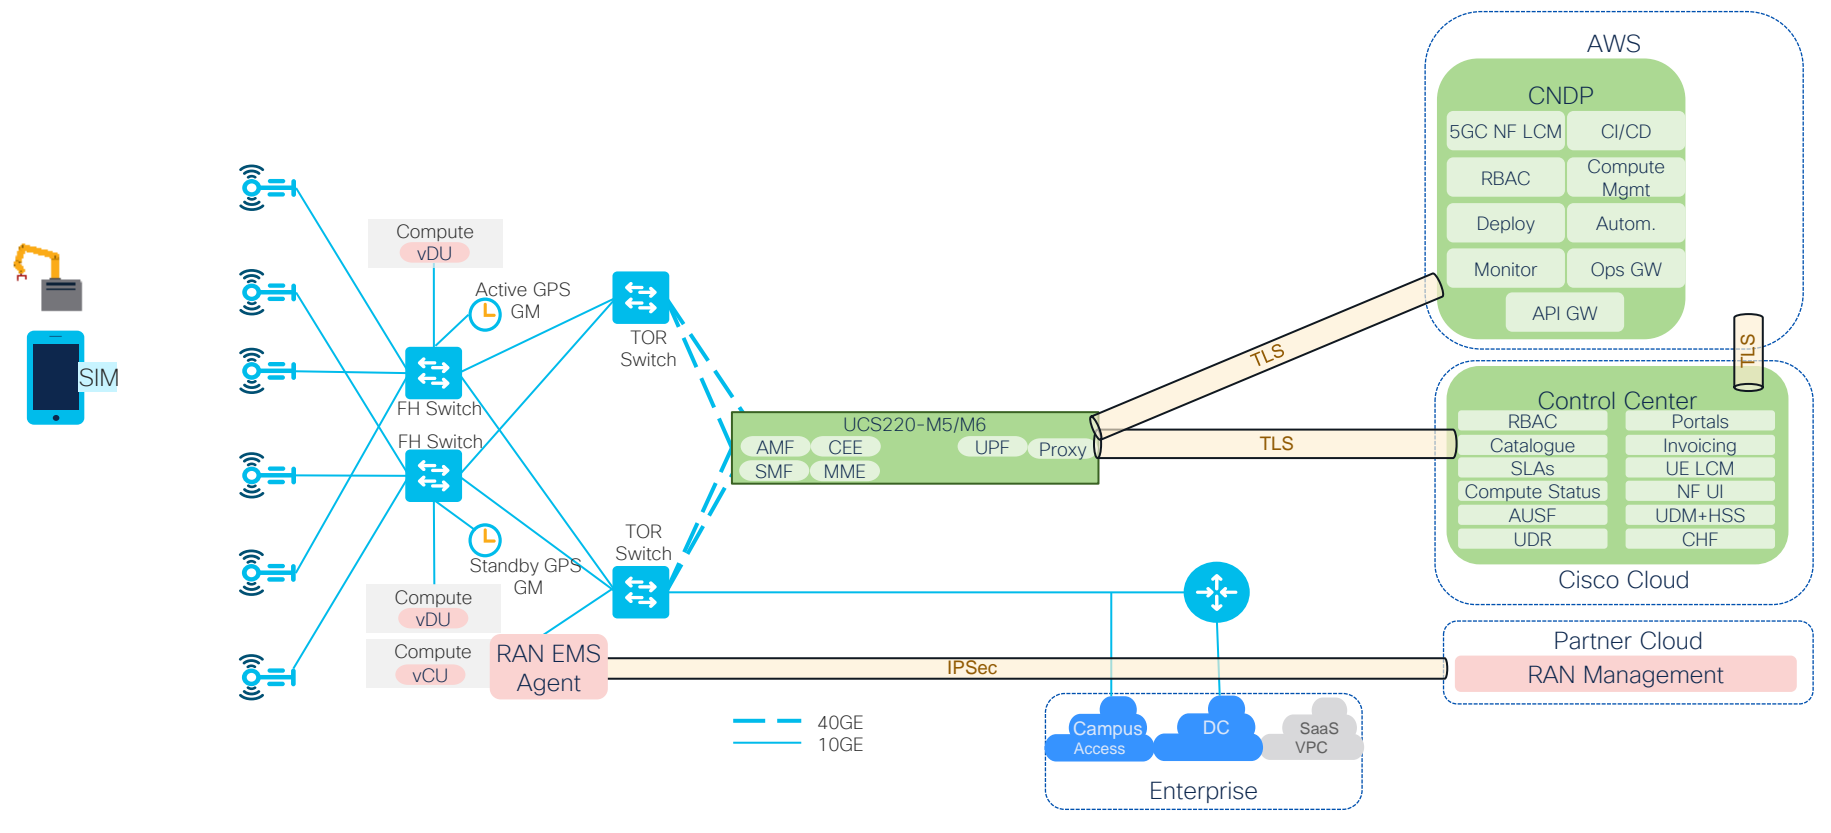

Cisco P5G offering includes

- 3 x Cisco UCS servers
- 1 x Cisco radio subscription
- 20 x Cisco client UE subscription
- 2 x Cisco TOR switches
- Additional ISE instances

Key Take Aways
Clean spectrum
Compounding
subscription

(Sample) Enterprise Site Architecture

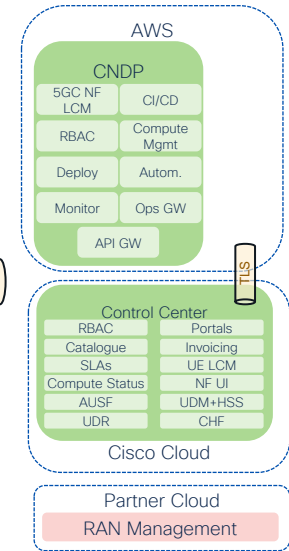

(Sample) Secure Multisite / Multi-Enterprise Model

- Secure proxy establishes a secure session and proxies the on-prem request to the Control Center
- Network functions on the edge to communicate with those on the Control Center Cloud in a secure manner
- Sessions keys are exchanged and are used to validate the session and create a session id that can be used by NFs to communicate

Secure Access (TLS, IPSec)

- Edge proxy initiates the communication to Control Center Cloud network function
- Cloud secure proxy is deployed in hardened docker container
- Keys use AES 256 encryption
- Edge data is tied to the account ID which ensures only the specific account can see that data

On-going service monitoring

Diagnostics

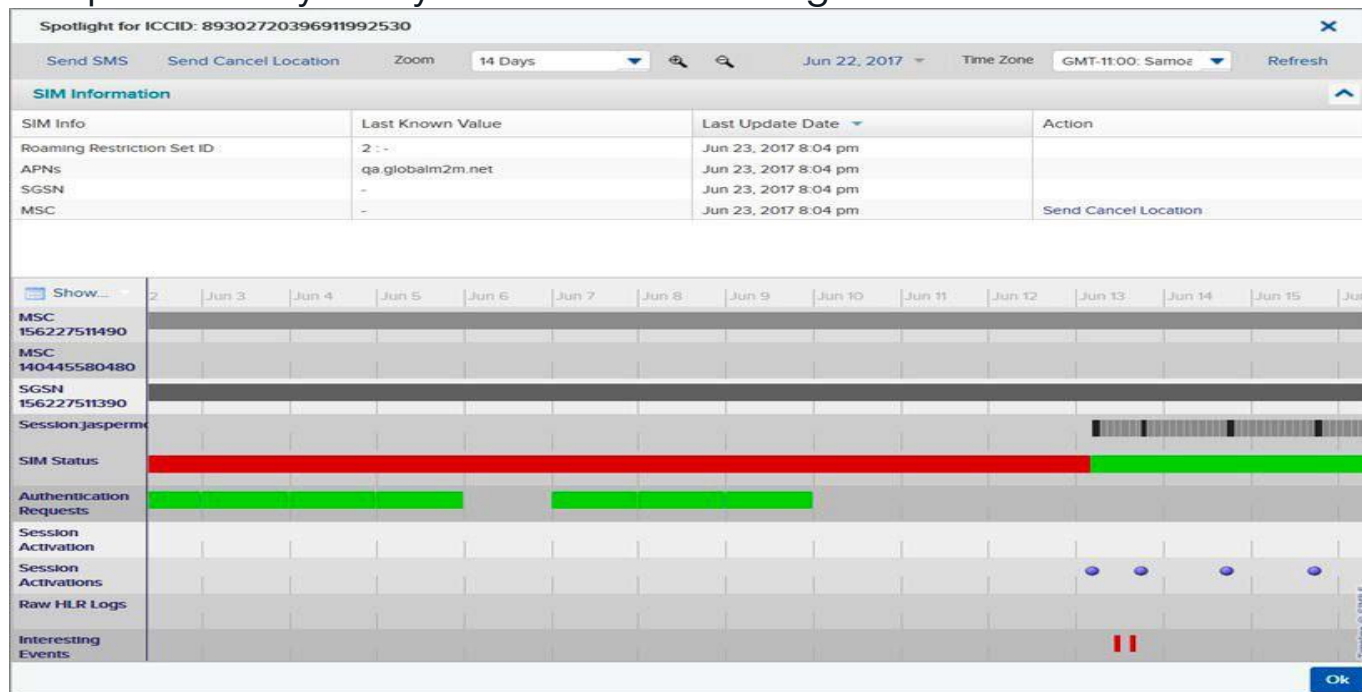

Automated diagnostics make it easy for non-technical enterprise personnel to monitor, diagnose, and even correct common network connectivity problems.

Enterprise can resolve 85-90% of their support questions with this tool alone

	Passed	Provisioning	SIM state permits passing traffic
	Passed	SIM / Device	SIM is allowed to use wireless network resources
	Passed	Network Connection	Successfully connected to wireless network
	Passed	IP / Internet	Device has an IP Address and is currently connected

Spotlight

The Spotlight tool provides a detailed snapshot of a device's connectivity history over the past 30 days so you can observe long-term trends

Finish

Complete your Session Survey

- Please complete your session survey after each session. Your feedback is important.
- Complete a minimum of 4 session surveys and the Overall Conference survey (open from Thursday) to receive your Cisco Live t-shirt.
- All surveys can be taken in the Cisco Events Mobile App or by logging in to the Session Catalog and clicking the "Attendee Dashboard" at <https://www.ciscolive.com/emea/learn/sessions/session-catalog.html>

Continue Your Education

Visit the Cisco Showcase for related demos.

Book your one-on-one Meet the Engineer meeting.

Attend any of the related sessions at the DevNet, Capture the Flag, and Walk-in Labs zones.

Visit the On-Demand Library for more sessions at ciscolive.com/on-demand.

The bridge to possible

Thank you
