# Agenda

## The Acceptance of Change in Corrections and Justice Agencies

- Introductions
- Enable Live Demo by Scheduling of VVS call
- Framing the Picture of VVS and its Uses
- What Customers have been asking for
- Capabilities of VVS/Technical Overview
- Questions taken throughout Session

# The Uses for remote Video in Corrections:

## What is it used for?

- Remote automated scheduling of **incarcerated persons (IP's)** through an agency's people, process, flow as its foundation.
- Court Appearances and Hearings
- Tele-medicine with FECC
- Educational Content Delivery
- Attorney/Client meetings with privilege maintained
- Government agencies, re-entry groups/service providers access to (IP's) through automation
- Delivery of cognitive behavioral programming as well as classes for domestic violence and anger management

## What are the features

- Role Based system to align visitors properly for scheduling video sessions
- Role 1 – The visitor module that allows a corrections agency to give rights for visitation to who they wish. This module has non-detectable officer live video and audio monitoring capabilities as well as full recording capabilities.
- Role 2 – Professional visitor module that does not allow recording or monitoring of calls. This is for trusted partners of the agency, including probation/parole, lawyers, investigators etc.
- Role 3 – Court representative module that allows a court to schedule a session with an IP for their court. This includes the ability to launch Cisco devices into Webex, Zoom and MS-Teams court collaboration platforms. Courts are non-recorded and non-monitorable.

## Can you empower an entire State Justice System with VVS

1. One VVS for a State DOC empowers **every court (local, County, State, Federal)** access to the State DOC's incarcerated population, to self schedule sessions. It also gives the same access statewide to any attorney, policing agency, federal magistrate, immigration court or other trusted partner of the State DOC
- One VVS for a single County Jail gives the same access as noted above in the State DOC example
- In any State where a Multi-Tenant VVS is desired, Cisco can align any number of County Jails within that state, into a Multi-Tenant VVS Instance. This helps to reduce costs for each jail, and gives the same abilities as the examples above to all of those jails participating

# VVS Solution Customer Journey and Ask's

## Customer Needs

- Ability to have hybrid capabilities for maintaining daily workflows during normal business, lockdowns and instant pivot capability for disaster recovery (man-made or natural)
- Secure and reliable QoS to assure uptime and oversight of visitation policy built within their system
- Enhancing remote programs that are designed to help reduce recidivism and better outcomes for the release
- Reducing the number of individuals who enter their facilities for services that can be delivered remotely. Thus, reducing internal escorts and outside transports, etc.

## Into Action

- Cisco has worked with multiple Prisons and Jails to assure that the most common people, process, and technology workflows were considered in every role-based module
- The first fully automated deployment was right here in Nevada
- Even in areas where some engagements have returned to normal (some courts), we find customers are interested in having the “next event” covered, by deploying a system for any pivot
- Long-held beliefs and resistance to technological advancements in justice immediately changed for most justice providers during Covid-19, allowing corrections to invest in the future

## The Resulting Change

- A hybrid future is now in civilian and government operations
- Wide acceptance of change within justice systems has allowed corrections flexibility in creating their technology future
- Greatly expanded delivery of (IP) services through remote virtual engagements
- Better representation time for attorneys and clients (allows data insight into the length of time for such calls)
- Better connectivity to programs, education, and healthcare to help prison systems and jails to design deliverables via VVS to help address recidivism
- Sick call and violence levels within facilities are proven to be reduced by expanded visitation and programs

# VVS – Visitor Interface

## Visitor Registration – Scheduling

### Visitor Registration and Scheduling

- Visitors can register to visit an Inmate. Once approved visitors will be notified and can schedule visits.
- System auto-selects the video endpoint and offers the available slots to select from

The image displays two screenshots of the Cisco Inmate Televisit interface.

The top screenshot shows the "Visitor Registration" page. It features a sidebar with navigation icons (home, calendar, user) and a header with the Cisco logo and "Inmate Televisit". The main content area has a progress bar with three steps: 1. Inmate Details, 2. Visitor Registration, and 3. Review and Submit. The "Inmate Details" section includes input fields for "First Name \*", "Last Name \*", and "Book/Case Number \*", each with a placeholder "Enter inmate [field name]".

The bottom screenshot shows the "Schedule Inmate Televisit" page. It displays inmate details for "Inmate 27" (First Name: Inmate, Last Name: 27, Book/Case Number: 252542, Location: Housing Unit/Dormitory/Room/Cell: Housing Unit 1, K151, A1, 404, Crimes: Burglary). Below the details is a "Schedule a visit" section with a calendar for April 2022. The calendar shows dates from 1 to 30, with the 18th and 19th highlighted. To the right of the calendar is a "Timezone" dropdown set to "Asia/Dubai" and a "Tuesday, April 19, 2022" header. Below this is a grid of available time slots for the day, ranging from 12:00 AM to 11:45 PM. The 01:00 PM slot is highlighted in blue. At the bottom, there is a section for "Additional Visitor(s)" with a "Visitor" input field, an "E-mail" field, and a "Relationship" dropdown. A "Cancel" button and a green "Schedule Visit" button are at the bottom right.

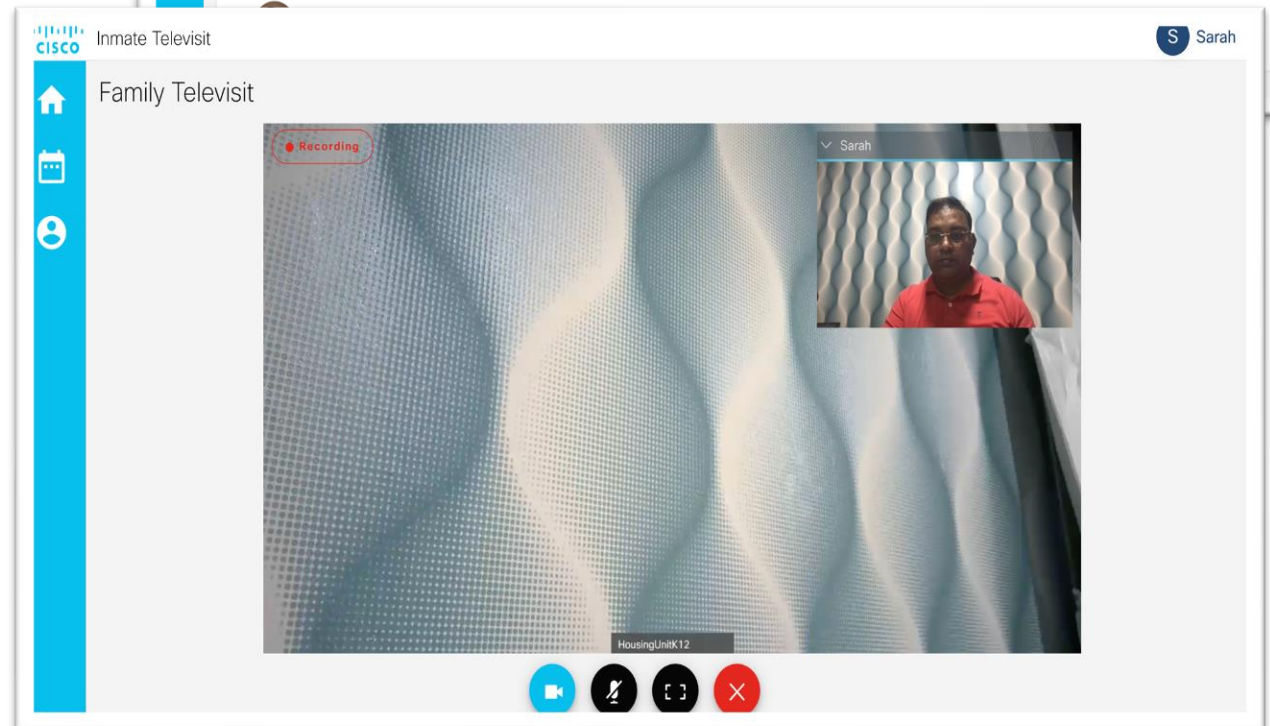

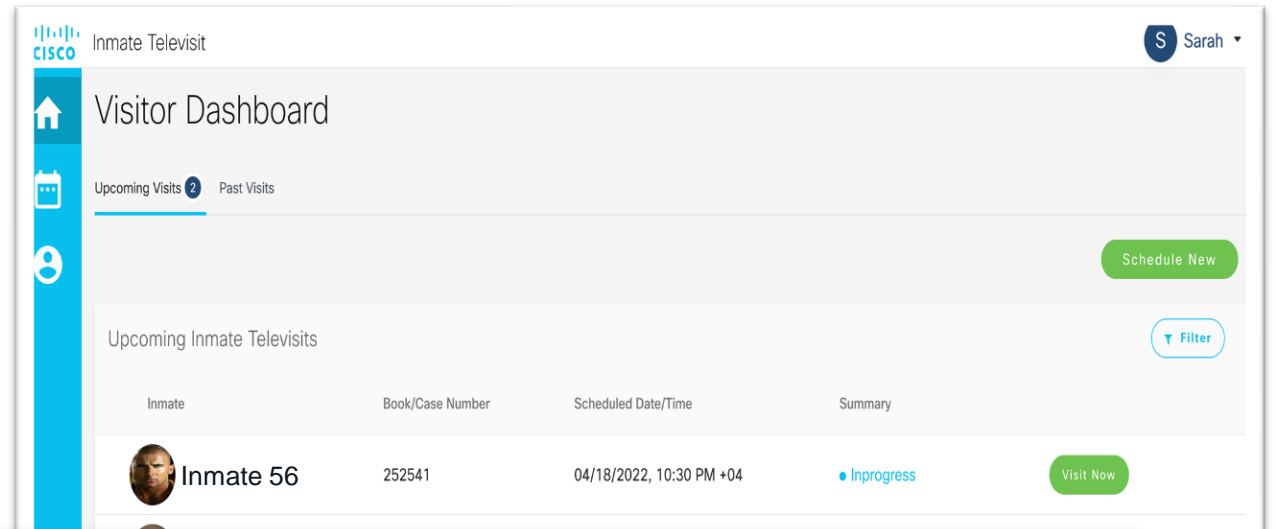

# VVS – Visitor Interface

## Visitor Dashboard – One Click Visit

### Visitor Login Creation

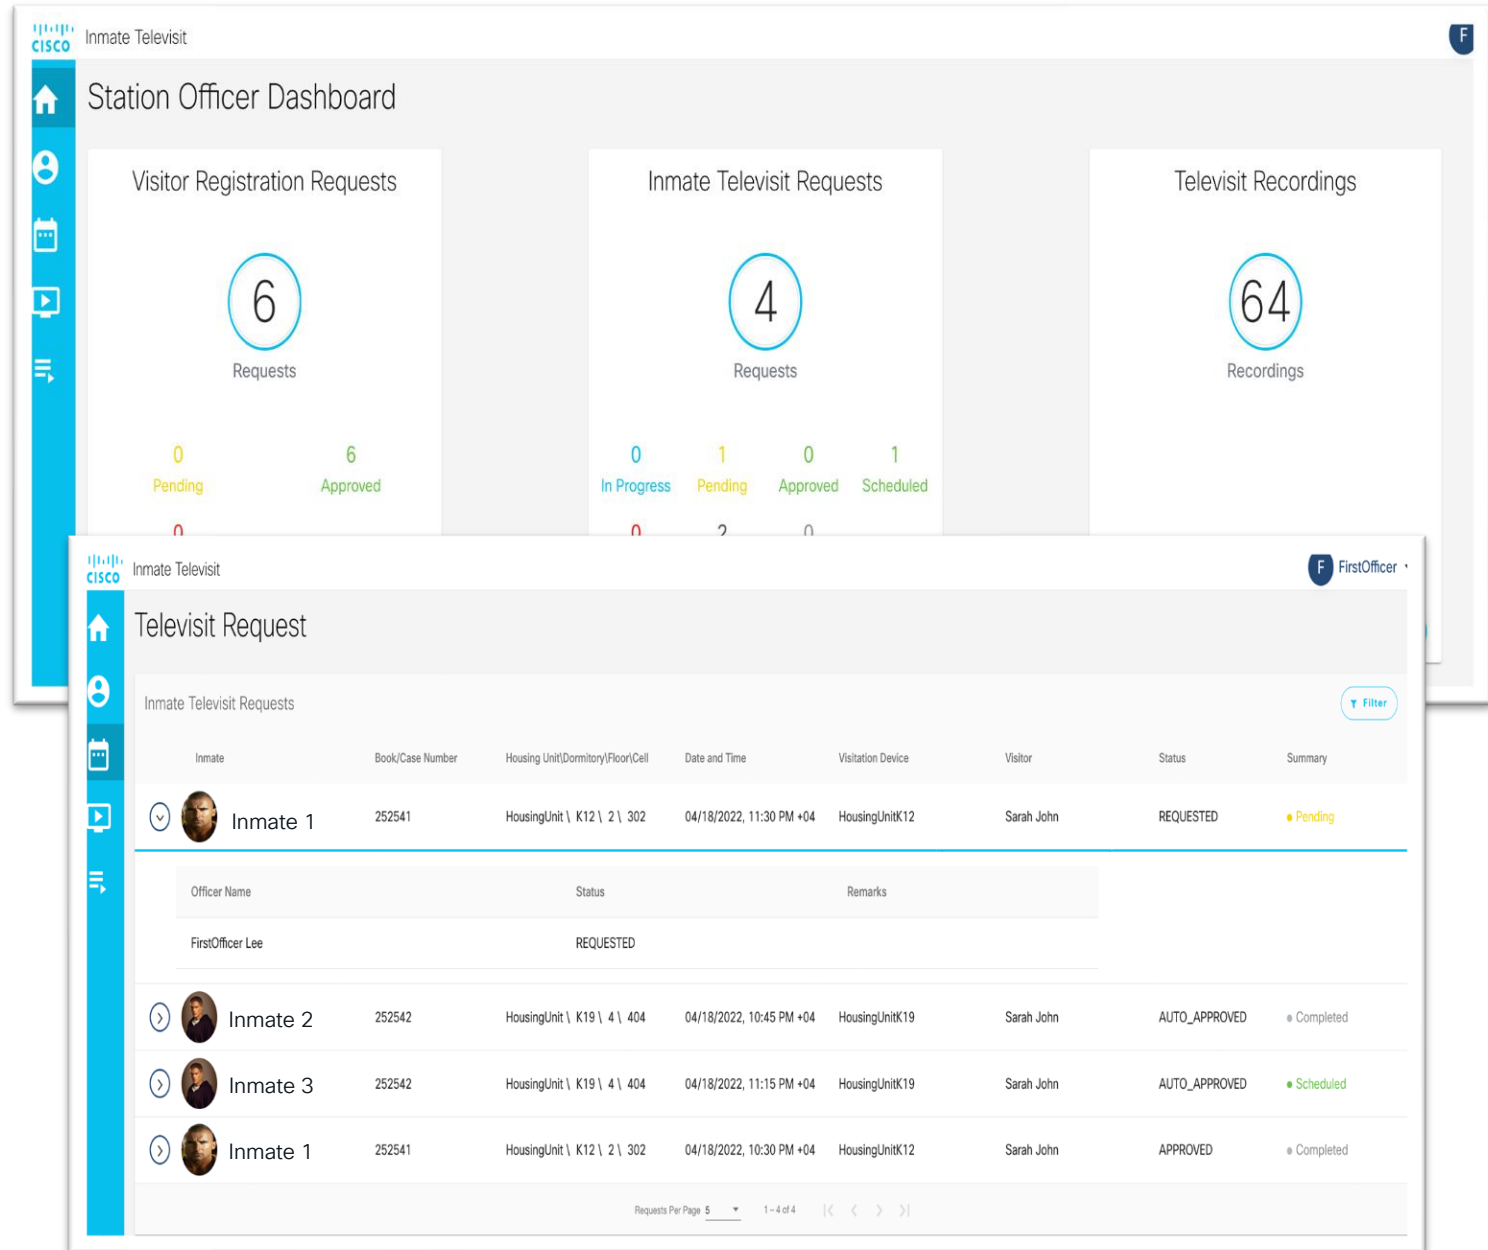

- Visitors can create a user account using their name and email address
- Dashboard screen will provide all the upcoming and approved visits
- User with a single click can auto-start the visitation using WebRTC in the browser experience
- Visits may be recorded and monitored

# VVS – Officer Dashboard Views

## Officer Dashboard

- Provides a quick snapshot to the officer of their registration and visitation requests
- Direct links to registration and visitation which require immediate attention
- Quick links to available recordings of inmate visits and in progress visitations

# VVS - Officer

## Visitor Approval

### Registration Approval

- Once the row is selected. The officer can review the information provided and approve or reject the registration with comments.
- Once approved or rejected the visitor will be notified via email or text message.

### Visitation Approval

- The visitor will be notified of the approval/rejection via email or text. Specified guests will be notified of approval by email.

## Recording & Live Visitation Monitoring

### Secure Monitoring and Recording

- All Visitations (non-professional) can be recorded if desired
- Admin policy to be set to your protocols for recordings access links and passwords
- Monitoring is available for visits that are part of the officer's approval process
- Simultaneously monitor up to nine video Visitations at one time on one screen. Multiple screens can be used as well

The screenshot shows the 'Inmate Televisit Recording' interface. It features a table with columns for Date and Time, Inmate, Visitor, and Recording. Each row includes a 'Request Password' button. The interface also includes a sidebar with navigation icons and a top bar with the Cisco logo and 'FirstOfficer' text.

## Dashboard and Configurations

### Dashboard

- Quick overview of device health
- User and Visitor Management
- Core platform settings and ability to integrate with SMS and Email Gateways
- Approval Groups for registration and visitation by location and process
- Announcements
- System Configurations

The screenshot displays the Cisco VVS Admin Dashboard. The top section, 'Admin Dashboard', features a 'Device Health' table with columns for Device Name, Product Type, Device IP, Device Serial #, and Connection Status. Below this is a grid of configuration cards for various system settings, each with a 'Configure' button.

Device Name	Product Type	Device IP	Device Serial #	Connection Status
HousingUnitCA2	Cisco Webex DX80	172.20.80.101	FOC2343P7PE	disconnected
HousingUnitK21	Cisco Webex DX70	192.168.2.3	FOC2046NJY4	disconnected
HousingUnitJVN1	Cisco Webex DX70	192.168.2.218	FOC2030NEAU	disconnected
HousingUnitJVN2	Cisco Webex Desk Pro	192.168.1.23	FOC2434K1EF	disconnected
HousingUnitK10	Cisco Webex Desk Pro	192.168.1.17	FOC2417NLDY	offline_expired
HousingUnitK11	Cisco Webex DX80	192.168.1.19	FOC2335N84B	disconnected
HousingUnitK12	Cisco Webex DX80	192.168.2.143	FOC2309P7CX	connected
HousingUnitK13	Cisco Webex DX80	192.168.2.150	FOC1949N8A2	disconnected
HousingUnitK13	Cisco Webex DX80	10.55.211.212	FOC2329NK0D	disconnected
HousingUnitK14	Cisco TelePresence SX10	192.168.2.230	FTT204201WD	offline_expired

The configuration section includes cards for: Announcements, Custom Settings, Meetings Platform, Notifications, Platform Settings, Social Configuration, Visitation Locations, Visitation Schedules, and Visitation Policy. Each card provides a brief description and a 'Configure' button.

# VVS - Administration

## Scheduling and Policies

### Visitation Schedules

- Schedule creation allows the administrator to define multiple schedules and time zones
- Can be defined per location to manage when meetings, appointments, or visits are allowed to take place
- Schedules show detailed working hours per day for each location
- Visitation Policies can be managed at the system level.

The screenshot displays the VVS Administration interface. On the left is a blue sidebar with icons for home, user, location, schedule, settings, and other functions. The main content area is titled "Visitation Locations" and contains a "Manage Locations" table. The table has columns for Location Name, Description, On-Site Schedule, Remote Schedule, and a Delete button. Five locations are listed: US NY1, US NY2, US NY3, US NY4, and US NY5. A "Create new" button is in the top right, and a "Filter" button is in the top right of the table. A "Visitation Policy" modal is open, showing settings for Inmate and Visitor. The Inmate section includes fields for Visitation Frequency (Monthly), Number of Visits Per Frequency (100), Visitation Length in Minutes (10), and a checkbox for Scheduler. The Visitor section includes fields for Minimum Time Prior to Scheduling (0 days, 0 hours) and Visitor Registration Expire Period (0 days, 3 months, 0 years). Both sections have checkboxes for Scheduler and Front Desk. At the bottom of the modal, there is a checkbox for "VISITATION RECORDING ENABLED" and a checkbox for "Visitations Recorded". "Cancel" and "Save" buttons are at the bottom right of the modal.

Location Name	Description	On-Site Schedule	Remote Schedule	
US NY1	US NY1	US NY On-Site	US NY Remote	Delete
US NY2	US NY2	US NY On-Site	US NY Remote	Delete
US NY3	US NY3	US NY On-Site	US NY Remote	Delete
US NY4				Delete
US NY5				Delete

## Dashboard and Scheduling

### Dashboard

- See upcoming schedule
- One-click into visitation at the designated start time
- Visitations are never recorded

### Schedule

- Schedule visitations based on system policies and approval processes

The screenshot displays the Inmate Televisit interface, which is part of the Cisco Live! system. The top navigation bar includes the Cisco logo, the text "Inmate Televisit", and a user profile icon labeled "R Rob". The main header is "Inmate Dashboard". Below this, there are tabs for "Upcoming Visits" (selected) and "Past Visits". A "Schedule New" button is located in the top right corner of the dashboard area.

The "Upcoming Visits" section features a table with the following columns: Inmate, Case Number, Schedule, and Summary. The table contains one entry for James Moriarty, with Case Number 125232, scheduled for 04/11/2023 at 4:33 PM EDT, with a status of "Approved". Action buttons "Cancel" and "Edit" are visible next to the entry. A "Filter" button is also present.

Below the table, there is a pagination control showing "Visits Per Page 5" and "1 - 1 of 1".

The "Inmate Details" section is located below the dashboard. It shows the inmate's information: First Name James, Last Name Moriarty, Book/Case Number 125232, Location RobLocation, and Visitation Type Remote Visit (selected). A profile picture placeholder for James Moriarty is shown.

The "Schedule a visit" section is at the bottom. It includes a calendar for April 2023, with the 11th highlighted. To the right of the calendar, there is a form for scheduling a visit. The form includes a "Timezone" dropdown set to "America/New\_York", a date selector for "Tuesday, April 11, 2023", a "Start Time" of 4:47 PM EDT (-04:00), an "End Time" of 4:57 PM EDT (-04:00), and a "Visitation Length" of 10 Minutes. A "Change Visitation Settings" button is located at the bottom right of the form. Below the form, there is a section for "Available Time Window(s)" showing a list of time slots: 04:47 PM, 04:59 PM, 05:11 PM, 05:23 PM, and 05:35 PM.

# VVS – Front Desk

## Front Desk View and Scheduling

### View

- Able to view the upcoming schedule
- Visibility into visitation details

### Schedule

- Schedule visitations on behalf of other users (Attorney, Family)
- Edit or move visitations as needed

The screenshot displays the 'Front Desk Dashboard' with a sidebar on the left containing a home icon and a calendar icon. The main content area is divided into two sections: 'Upcoming Visits' and 'Inmate Televisit'.

**Upcoming Visits**

Inmate	Case Number	Schedule	Visitor Type	Visitation Location	Summary	
Pink Floyd	8878	04/11/2023, 4:00 PM EDT	Friend	RobLocation	Inprogress	
James Moriarty	125232	04/11/2023, 4:00 PM EDT	Friend	RobLocation	Inprogress

Time Window

# VVS – Facilitator

## Front Desk View and Scheduling

### Start visitations

- Allows visitations to be started for offenders on non-Cisco devices (tablets, PCs)
- Facility users can log in and see the upcoming schedule in the browser
- Click on a Start Meeting to join
- The facility user is logged out leaving only the ongoing visitation within the browser

The screenshot shows the 'Inmate Televisit' interface. At the top, there's a Cisco logo and the text 'Inmate Televisit'. A user profile 'R Rob' is in the top right. Below the header, a 'Televisit Request' section contains a table. The table has columns: Inmate, Case Number, Schedule, Meeting Place, Visitor, and Summary. A single row is visible for 'James Moriarty' with case number '125232', scheduled for '04/11/2023, 4:35 PM EDT' at 'Chromebook2'. The status is 'Inprogress' and there is a 'Start Meeting' button. A 'Filter' button is in the top right of the table area. At the bottom, there's a pagination bar showing 'Requests per page 5' and '1 - 1 of 1'.

Inmate	Case Number	Schedule	Meeting Place	Visitor	Summary
 James Moriarty	125232	04/11/2023, 4:35 PM EDT	Chromebook2	Inprogress	<a href="#">Start Meeting</a>

# VVS – Court Representative

## Court Scheduling

### Scheduling

- Schedule an inmate for a specific location and device
- Webex links are provided for additional control of hearings
- Court Rep groups can share the schedules
- Allows connection to either Webex or can be used with Zoom or Microsoft Teams via SIP dial.
- Hearings can be extended if schedules allow

**Inmate Televisit**

Timezone: America/New\_York

Visitation Length: 30 Minutes
